NEW CARRIAGES! NOW IS YOUR TIME TO BUY A GOOD CARRIAGE FOR A LITTLE MONEY.

Second-Hand Carriages, Such as TOP BUGGIES, PHAETONS, CARRYALLS, COV-ERED WAGONS SIDE-BAR BUGGIES, AND ONE SINGLE SEAT TRACK WAGON.

B. F. MORSE, - - Augusta, Maine.

Twenty-Six Seasons, and still in Advance of all other Machines in Fewness of Parts and Great Simplicity.

Will do all practical work that can be done in the hay-field, carries all weight on the drive-wheels, giving all weight of the machine for driving power to the cutter, and does not load and lug the horses' necks as other machines do, with a heavy dragging frame in front of axie. Does not lift the cutter-har necks as other machines makes higher cut when going up hill or when the toam pulls hard. Makes even work up hill, down hill, and over hummocks and cradle holes and in heavy bottoms. Has the Double Hinde Joint, giving perfect flexibility to the floating cutter-bar. Has but a single lever which lifts only the cutter-bar and this higher than any other machine. In all situations and under all circumstances maintains the LEVEL CUT, leaving a short, oven stubble in all parts of the field. Has LESS MACHINERY & PEWER PARTS than any other machine, and ne extra levers. From its GREAT SIMPLICITY can be understood and kept in order by the ordinary farm-hand.

The bar folds flat across the frame and the machine can be put entirely out of goar, making it as SAFE AS A FARM WAGON when on the road or going from field to field. No loose shackling swivels or superfluous levers constantly liable to get out of order. The BUCKEYE is ALWAYS IN ORDER and always ready for work, and will STAND MORE ABUSE with less injury than any other machine and cost much less for repairs. Will cut lodged grass and all grass where a machine can be used, and is of LIGHTER DRAFT THAN ANY OTHER MACHINE MADE.

Valuable Patented Improvements for 1882, Valuable Falented improvements for 1862,

By which the SHEAR-CUT, so essential to the perfect working of the mower, is SURE TO BE MAINTAINED DURING THE WHOLE LIFE OF THE MACHINE, insuring light draft and causing the
BUCHEYE to cut as well after years of use, as when the cutters are new. These well-tested and continually improved merits and staunch qualities have made the BUCKEYE THE STANDARD. The highest
claim of other machines is that they are equal to the BUCKEYE. The BUCKEYE, with its FEW PARTS
claim of other machines is that they are equal to the BUCKEYE. The BUCKEYE, with its FEW PARTS
and GREAT SIMPLICITY will do ALL WORK and a GREATER VARIETY OF WORK THAN ANY
OTHER MACHINE; hence it is the BEST AND CHEAPEST, AND THE ONLY MACHINE A FARMER
SHOULD THINK OF BUYING. Be sure and send for Circular describing improvements for 1882.
